

Sunbuilt Group

Your logins, passwords, and how everything works — in plain English

Keep this document private. It contains your real business passwords. Store it somewhere safe (not shared publicly), and only send it to people at your company who need this access.

1. Your Bario Account (Request Portal)

This is your main account with us (Bario). From here you can send us work requests (anything you need built, fixed, or changed on your website or business tools) and get an automatic time estimate for when it'll be done. It also has quick-access buttons to your other tools, like your CRM.

Website	www.bario.ca/login
Email	admin@sunbuiltgroup.com
Password	A password-reset email was sent to this address when your account was created, so you should already have set your own password from that email. If you can't remember it, click "Forgot password?" on the login page and a new reset link will be sent.

Once logged in, go to the **Requests** page — you'll see a "Quick access" box at the top with one-click buttons straight to your CRM and your public website.

2. Your Website

Your public website (sunbuiltgroup.com) is hosted and managed by the Bario team on your behalf — there's no separate admin login for you to manage it directly. If you ever need something changed, added, or fixed on the site, submit a request through your Bario Account (Section 1) and it'll get done for you.

Website	sunbuiltgroup.com
----------------	-------------------

3. Your CRM (Customer Relationship Manager)

This is a separate tool for tracking leads, contacts, and notes about the people and businesses you deal with — like a digital rolodex with a memory.

Website	sunbuilt.crm.bario.ca
----------------	-----------------------

Email	admin@sunbuiltgroup.com
Password	SunbuiltGroup2026!Secure

Easiest way in: log into your Bario Account (Section 1 above) and click the “Open Your CRM” button — no need to remember this address separately.

4. Your Business Email

Your company email is hosted with Hostinger (your domain registrar), separate from Bario. We don't have your email password on file — if you need it, check your Hostinger account directly, or ask whoever originally set up your email at your company.

5. Your Business Phone Number

Number	825-435-2121
What it does	Calls and texts to this number are handled automatically and forwarded to your real phone.

Need Help?

The fastest way to reach us for anything — a bug, a new feature, a question, a password issue — is to log into your Bario Account (Section 1) and submit a request on the Requests page. You'll get an automatic estimate of when it'll be handled, and you can reply right there to keep the conversation in one place.
